

SVMS CHROMEBOOK SUGGESTIONS FOR GRADES 4 AND 5 WHO ARE LOOKING TO PURCHASE THEIR OWN DEVICE FOR SCHOOL AND HOME

2020 - 2021

For the 2020 – 2021 school year, SVMS is making the following recommendations to parents purchasing Chromebooks for their students. It is our suggestion that you purchase a Chromebook that is advertised as rugged and specifically designed for students. Each student will be transporting the device from home to school and back every day. Broken Chromebooks will cause stress during the school year and interruptions with the availability of the device. The chromebook will be provisioned in school and can be used through grade 8.

The following suggested Chromebooks are specifically designed for students and should hold up well under heavy use. An 11.6” screen is recommended as the school will provide a case for each student; however, this is not required. You may also choose to purchase a case.

- **Lenovo 300e**
- **Asus Chromebook Flip C213SA**
- **Asus Chromebook C202SA-YS02**
- **HP Chromebook 11 G7 EE**
- **Dell Chromebook 11**

We recommend you purchase a protection plan. Basic protection and accident protection plans are offered by most retailers. However, if you decide not to purchase a plan, SVMS has had a positive working relationship with LaptopMD for Chromebook repairs and their contact information is as follows:

LaptopMD
