

Learning to Code through Scratch

Hi! My name is Zach Vincent, an SVMS alum and rising senior at Delbarton School. I have been learning to code for many years, and I would like to share what I've learned and introduce other kids to the world of code. I will be teaching week-long online classes for rising 5th and 6th graders on a drag-and-drop coding block program called Scratch, an application developed by MIT. Students will learn how to code by creating a balloon-popper game with this application.

- \$55 class fee per student
- One hour of live group instruction and one hour of virtual-drop in office hours each day for one week
- Max ten students per class
- Currently scheduled weeks:

<u>Week of...</u>	<u>Class</u>	<u>Office hour</u>
June 22-26*	1pm	2pm
June 29-July 3	9am	10am

* \$10 discount for the first week of classes

For more information on the course, and to see when more courses will be added, please visit my website at zvbuilds.com!
