

Dear Parents,

Your child's summer math work will be completed on IXL.com or on the IXL app (that can be downloaded for free).

You should all be familiar with IXL. Sign into IXL.com using username and password. You see a green bar across the top, click on Learning and select the First Grade Skills. All required skills should have a yellow star next to it. Locate the specific skill listed and answer the questions until your child has reached at least an 85% (proficient).

Their summer work was designed with the intention that they should be going on IXL two to three times a week over the summer. This is meant to keep their brains working throughout the summer and to help them remember all that they learned this past year in math. They are expected to complete each skill from the list with a minimum score of 85% to be proficient in each of the topics.

We will be monitoring their progress throughout the summer. Please don't let your child leave the work to the last minute as that defeats the purpose of keeping their brains active all summer!

Sincerely,

Mrs. Fetrow (mfetrow@svmsnj.org)

Mrs. Galton (rgalton@svmsnj.org)
